

Information for Endodontic Patients

Northshore Endodontics, PLLC
Dr. Jeffrey Samyn, D.D.S., M.S.D.
www.northshore-endo.com

This information is provided to help you better understand both our specialty dental treatment and office policies, please read carefully. We appreciate your questions, so don't hesitate to ask.

Root canal treatment, or Endodontics, involves the opening of a tooth through the biting surface, cleaning out the diseased pulp ("nerve") tissue, and filling the remaining root canal space. This procedure usually takes one to two 90 minute appointments. Root canal treatment is known to be highly successful, but success cannot be guaranteed. Usually the alternative to root canal treatment is removing the tooth. Occasionally, despite all efforts, the tooth may require retreatment, surgery, or extraction.

I understand the possible complications involved in treatment, including the breakage of a metal instrument in the tooth, overextension of the filling material beyond the root end, blocked or calcified canals, perforation of the crown or root into the jaw bone, tooth fracture, numbness, pain, and infection. I understand the possible consequences of not receiving treatment in the near future, including the risk of infection, pain, and potential tooth loss.

After your root canal treatment is completed, a temporary filling will be placed to seal the tooth. I have been informed of the importance of placing a permanent filling in, or crown ("cap") placed over the tooth reasonably soon after endodontic treatment is completed. I understand my general dentist will render this service which is essential to avoid recontamination of the root canal and possible fracture and loss of the tooth.

I have received an estimated fee for the treatment to be performed. I have read the separate Treatment Fee Sheet and understand I am responsible for any services not covered by dental insurance. I agree to pay the stated fees in full by the final treatment appointment. Please speak to our receptionist, **prior to treatment**, if you have not been made aware of your estimated fee.

I have had the opportunity to ask questions about the proposed treatment and have had them answered to my satisfaction. I have read and understand the previous information, and present myself, or a minor child, for treatment as discussed.
